

CEDAR

CYP IAPT Inpatient CAMHS Training Programme South West Collaborative

The training is back! From November 2019 – February 2020
Clinical Education Development and Research (CEDAR), University of Exeter

Back following the successful delivery of cohorts 1 – 3 earlier this year, the CYP IAPT CAMHS training programme provides an innovative 10-day research informed training. This course includes an opportunity to share ideas and work alongside staff from the regional inpatient units and is taught by a team of both national and regional experts in the field.

Topics include: good communication within systems, the impact of secondary trauma, shared decision making, the family life cycle, enhancing the therapeutic milieu, clinical supervision, outcome monitoring, shared formulation, managing risk and transitions. Teaching draws on existing expertise and emphasizes reflective practice and experiential learning.

Suitable for: All staff - no prior academic or professional requirements. Suitable for any staff from the Multi-Disciplinary Team from band 2 upwards.

Currently seeking expressions of interest - There are limited places available so please contact your service manager in the first instance and at the University, the Programme Administrator on - cyp-iapt@exeter.ac.uk or Programme Lead Hannah Sherbersky with any questions on - H.Sherbersky@exeter.ac.uk
